VITREOUS ENAMEL PANEL / MANUFACTURED BY FAIRVIEW

EDMONDSON PARK RAILWAY STATION

PROJECT: EDMONDSON PARK RAILWAY STATION
LOCATION: EDMONDSON PARK, SYDNEY
DEVELOPER: RAILCORP
BUILDER: JOHN HOLLAND GROUP
COLOUR: TOMATO RED
PRODUCT: VITRANAMEL, 1050M²

The Edmondson Park Railway Station is part of the South West Rail Link development, a 12km passenger train line that runs from Glenfield to Leppington. The project included the building of a new railway station as well as a commuter carpark with over 1,000 car spaces.

The new Edmondson Park Railway Station has been credited with connecting more Liverpool residents to the Sydney train network, reducing air pollution in western Sydney and minimising road congestion.

We supplied our highly durable Vitranamel cladding panel for the project, which is ideal for infrastructure developments that have high traffic areas and require non-combustible cladding.

Edmondson Park Railway Station is part of South West Rail Link's 12km passenger train line that runs from Glenfield to Leppington
