TARONGA ZOO

PROJECT: TARONGA ZOO CENTENARY THEATRE
LOCATION: TARONGA ZOO, SYDNEY, NSW
ARCHITECT: TKD ARCHITECTS
BUILDER: KANE CONSTRUCTION
INSTALLER: THE GREAT WALL INTERIORS
PRODUCT: EQUITONE TECTIVA 655M²
COLOUR: TE20

Taronga Zoo has long held education and conservation of wildlife in high regard. So much so, that they have developed a state-of-the-art theatre designed to immerse guests in films regarding their efforts in this area.

The exterior of the theatre reflects the capabilities of the technologies inside while still being sympathetic to the surroundings within Taronga Zoo. This is achieved thanks to Equitone's TE20 through-coloured finish in the Tectiva range which allows for crisp, monolithic details.

The warm natural character of the Tectiva range is attained during the manufacturing process, where each panel develops a unique texture, colour and surface. It also has the advantage of being non-combustible, environmentally-friendly and has a long life expectancy.

Equitone's Tectiva was chosen to clad the exterior of a new theatre in the heart of Taronga Zoo
