

Cerama**PANEL**

Classic

Cerama**PANEL** Classic is a 9mm prefinished compressed fibre cement facade panel which is finished with a highly durable factory applied fluoropolymer paint system.

This product is both an aesthetically appealing and cost-effective solution available in an unlimited colour range... simply choose your preferred colour and we will handle the rest! It can be cut-to-size and offers all the benefits of the raw fibre cement board such as impact resistance and non-combustibility.

No need for traditional on site painted methods that involve messy and time consuming trades.
