

A low-angle photograph of a modern building facade. The facade is composed of large, rectangular panels in various shades of grey, beige, and white, arranged in a staggered, grid-like pattern. A dark, cylindrical downspout runs vertically along the right side of the building. The sky is a clear, bright blue.

Cerama**PANEL**

Depth

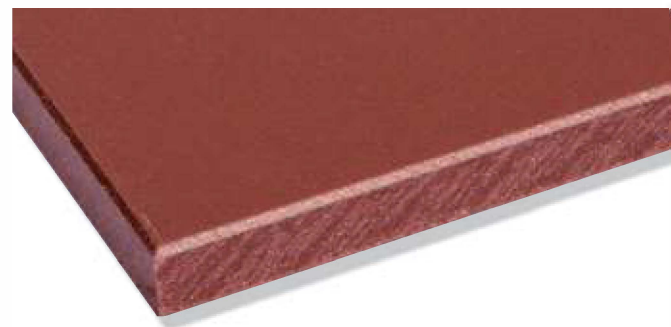

CeramaPANEL Depth facade boards combine the natural characteristics of the through coloured fibre cement with the extremely durable clear topcoat. The colour added to the fibre cement reveals and highlights the fibres and other raw materials that provide its strength and character. The extremely durable clear coating then protects the board and ensures a smooth surface with a long service life.

Properties

CeramaPANEL Depth

Length	2500 / 3050mm
Width	1250mm
Thickness	8mm
Weight	11.6kg/m ²
Surface	Smooth matt finish

Colours

 CPD-7033	 CPD-7043
 CPD-6015	 CPD-9001
 CPD-3004	 CPD-1014
